

Brand Physics

Visual specification for this engagement (appendix to the Scope of Work)

Visual source of truth for the proposal. Tokens live in `css/styles.css`. Open `brand.html` for the live board.

Spectrum

Not gray glass. Light moves cobalt → coral.

Token	Value	Role
--cobalt	#0d6efd	Cool facet, SMS band, focus
--cobalt-deep	#1e60ff	Interactive glow
--cobalt-ink	#163a9a	Links, secure text
--coral	#ff5e4d	Warm facet, WhatsApp band, donate heat
--tangerine	#ff7a59	Mid-spectrum, Email band

Ambient page wash stays mist (#f5f6fa) over a fixed mesh. Grain overlays at ~42% overlay blend.

Three glass depths

- 1. **Ambient:** `.site-canvas`. Soft frost over the mesh. Public pages only.
 - 2. **Interactive:** buttons, shards, Shift cards. Brighter edge (`--glass-border`), caustic hover (border + glow), **no scale-up**.
 - 3. **Secure:** `body.theme-secure`. Darker field #12162a, blur capped, contrast first. Login and portal.
- KYR surfaces use `body.theme-kyr`: interactive glass is allowed; no decorative 3D.

Type

- **Playfair Display italic** — voice, mission, display. Never for form labels or portal tables.
- **Inter** — chrome, nav, forms, shift tools, payload notes.

Motion

- Language is refraction: opacity, gradient shift, caustic edge. Not bounce and not `scale(1.045)` on every hover.
- Shift Glass: expand roles on tap; confirm in a centered dialog
 - Film play-reveal: keep existing documentary behavior
 - `prefers-reduced-motion: reduce` — no auto hero cycle (existing)

People in the brand

Photographs are the solid. Color and glass are the light around them. Do not replace community with a 3D object.
